CAREER OBJECTIVE

Motivated computer science student seeking a Software Development Engineer Internship or Full-Time SDE role to apply strong full-stack development skills, problem-solving abilities, and passion for building scalable applications. Seeking opportunities to contribute to innovative projects while continuously learning cutting-edge technologies.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript

Frontend Development: React.js, HTML, CSS, Tailwind CSS, Vite

Backend Development: Node.js, Express.js

Database & Storage: MongoDB

Tools & Technologies: Git, GitHub, JWT, bcrypt, Socket.io, Zustand, REST APIs

Core CS Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

PROJECTS

Real-Time Chat Application

Tech Stack: React.js, Node.js, Express.js, MongoDB, Socket.io, JWT, Zustand, Tailwind CSS

- Designed and developed a full-stack real-time chat application with secure authentication, enabling instant message delivery between users
- Implemented JWT-based authentication and authorization with bcrypt password hashing to ensure secure user access and data protection
- Integrated Socket.io for real-time bidirectional communication, delivering messages instantly without page refresh or delays
- Built responsive user interface using React.js and Tailwind CSS with smooth state management via Zustand for optimized re-renders
- Designed and implemented REST APIs using Express.js for user management, message storage, and real-time communication protocols
- Implemented online/offline user status tracking and integrated MongoDB for persistent data storage of users and message history

MERN Todo Application

Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT, Tailwind CSS

- Developed a secure full-stack Todo application with JWT-based user authentication and complete CRUD functionality
- Implemented user-specific data isolation to ensure each user can only access and modify their own todos
- Built REST API endpoints for todo creation, retrieval, update, and deletion with proper error handling and validation
- Created responsive and intuitive frontend UI with React.js and Tailwind CSS providing seamless user experience across devices

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science

Bundelkhand University, Jhansi | Current Semester: 5th | 4th Semester SGPA: 8.48 | Expected Graduation: 2028

DATA STRUCTURES & ALGORITHMS

Strong foundation in Java with consistent LeetCode practice and problem-solving experience. Proficient in: Arrays, Strings, Linked Lists, Trees, Heaps, Hashing, Binary Search, Recursion, Backtracking, Dynamic Programming, Greedy Algorithms
